

Topaz News

Redwood visit

We had a super time in the woods. There was a giant web to climb through, logs to balance on and we made homes for hedgehogs. Back in school we have continued to find out about hedgehogs and have a animal rescue centre as a role play.

Gem power

Dr Tom thought Topaz class were amazing! He talked to us about building ruby, emerald and sapphire powers as well as diamonds. The children were very inspired and we will develop over the coming weeks. We made a video of the evening so if people are interested I am willing to run a catch up session. Let me know your thoughts.

Life Bus

Jeanette on the Life Bus talked to us about keeping healthy. She told us that we need food, air, exercise, water and sleep. Her friend Harold the giraffe helped us to explore how to help yourself feel better when you are sad. We have already linked our drawing and writing to what we have learnt and will continue following up next week.

Letters and Sounds

There are no new sounds this week. We are consolidating the ones we have and learning to use them. I have completed a 1:1 screening this week so all of the children have their individual next steps in their red books. A little bit of practise every day will really help right now.

Next week I will set up log in details for Bug Club so look out for these in the home/school book.
