## Topaz News

Dear All,

### Learning

Our PE has had a space theme this week. We have been jumping in craters, balancing, climbing up and jumping off things in a controlled way. As well as helping us to keep fit and healthy, this also helps us with our reading and writing. You can support balancing and climbing with trips to the park. We have also loved the video clip below that we have used in the classroom.

<https://www.youtube.com/watch?v=YFe0I8kkFOg>

In maths we have used 10 frames as another way to count, develop place value and number bonding. We have had guided sessions each day and mastered skills in activities within the environment. Some of them very slimy! Ask the children for more information.

Our imaginations have been running wild with our alien designs. We have designed and written about our own aliens and are now painting large ones for the classroom linking our painting and collage skills

### Star gazing

We are looking forward to star gazing next Friday evening from 5.15 – 7pm. Look for the slip in the book-bag and send back so that we can make final arrangements.

Kind regards,

*Sally Windmill*
