

Topaz News

Dear All,

It has been a busy week in Topaz this week. Following the alien crash landing we decided to make some alien friends in our forest session.

We have been building our stick-ability and problem solving skills and making sure that we are challenging ourselves to be purple learners. We have been using Numicon to make rockets and write number sentences, painting aliens, making plans and models for space vehicles. Some of us have even been to the moon!

In maths this week we have also been looking at number order with the Number blocks. At home you can support by taking the numbers off your keyring, ordering them then hiding one and seeing if your child can guess which one has gone missing.

In phonics we have worked on segmenting and blending adding the sounds igh/or/ai. My video of phase 3 sounds won't work so I will record a new one. We will be celebrating 5 times a week reading/phonics practise every Friday in celebration assembly so write in the book each time please.

Next Week

We are hoping that our Beat Bus session will start on Monday. Sadly, our singing lady didn't come to our session last week. We're not sure why but I will keep you updated.

Forest sessions will be on Wednesday afternoons. Please message me if you can help on any Wednesday afternoon up until half term.

PE Tuesday and Friday

Warm regards, *Sally Windmill*
